## Newsletter for the Triple Anti-platelets for Reducing Dependency after Ischaemic Stroke Trial

Web: [www.tardistrial.org](http://www.tardistrial.org) Email: [tardis@nottingham.ac.uk](mailto:tardis@nottingham.ac.uk)

## Congratulations to... \*\*\*

- Barnsley, Basildon, Bath, Colchester, Kettering, Margate and Whiston hospitals - for randomising their first TARDIS patients.

## Welcome to...

- Barnstaple, Dunfermline/Kirkcaldy, Northumbria Healthcare, Eastbourne, St Helier, Poole, William Harvey, Lincoln, Boston, Southampton, Mid Yorkshire and Watford Hospitals - waiting to recruit their first patient.

## Help, Tips, Clarifications

- A supplier for cryogenic marker pens for freezer samples around £14.20 for 4 (+ VAT) is Appleton Woods who can be contacted at the following website address: [http://www.appletonwoods.co.uk/cgi-bin/sh000001.pl?REFPAGE=http%3a%2f%2fwww%2eappletonwoods%2eco%2eu%2f&WD=ns036&PN=Cryogenic\\_Marker\\_Pens%2ehtml%23aNS036#aNS036](http://www.appletonwoods.co.uk/cgi-bin/sh000001.pl?REFPAGE=http%3a%2f%2fwww%2eappletonwoods%2eco%2eu%2f&WD=ns036&PN=Cryogenic_Marker_Pens%2ehtml%23aNS036#aNS036)
- The randomisation result only remains available for 12hours on the website.
- Baseline/randomisation form – the choice of 'Existing Inpatient' must only be chosen if the patient was already admitted to hospital prior to their randomising event.
- The screening log on our website must be completed for all recruits screened for TARDIS, and kept in the Investigator Site File. This must be available for monitor/audit purposes.
- Please remember that dementia is an exclusion criteria. Please do not randomise these patients as it will be a protocol violation.
- Paper CRFs must be stored in the Recruit's Trial File and never in the hospital notes. There should only be one copy of these CRFs i.e. the master and any changes must be done on this copy.
- The original signed consent form/s must be kept either in the Investigator Site File OR in the Recruit's Trial File. They should never be kept in the hospital notes.
- The recruit's trial id number needs adding to all consent forms after the patient is randomised. Please do this prior to copying and filing in the trial file and hospital notes. Remember to fax these to 0115 8230273 within 2 days of randomisation please.
- Consent forms must be signed by the person taking the consent – who must be a medic, authorised on the site signature/delegation log to undertake this task.
- When consenting patients please ensure they understand their responsibilities in the trial including having trial bloods taken, returning (if not an inpatient) for follow-up visits at Days 7 and 35 to your hospitals, having a telephone follow-up at Day 90 from the Co-ordinating Centre and informing investigators of any problems experienced during the trial. We have had some problems recently where participants have refused to speak to the Day 90 follow-up co-ordinator.

## TARDIS Trial Office

Division of Stroke  
Clinical Sciences Building  
Nottingham University  
Hospitals NHS Trust  
Hucknall Road - Nottingham  
NG5 1PB

**Chief Investigator**  
Prof Philip Bath  
+44 115 823 1768

**Trial Medic**  
Sandeep Ankolekar  
+44 115 823 1769

**Trial Coordinator**  
Margaret Adrian  
+44 115 823 0210

**Trial Coordinator**  
Diane Havard  
+44 115 823 1773

**Database Programmer**  
Liz Walker  
+44 115 823 0285

**Trial Statistician**  
Cheryl Hogg  
+44 115 823 1670

**Data & Imaging Officer**  
Tanya Jones  
+44 115 823 1673

## UKSF Glasgow 2010

Prizes were awarded at the TARDIS Investigator Meeting to Stoke, Margate and Nottingham for 'recruiting the most patients in the previous 3 months' 'highest new recruiting site' and 'highest number of recruits in total'.

## TCD training

Transcranial Doppler (TCD) training can be accessed through Southampton General Hospital, their website: <http://www.suht.nhs.uk/tcdtraining> or contact Angela Cotton @ [angela.cotton@suht.swest.nhs.uk](mailto:angela.cotton@suht.swest.nhs.uk)

## Clopidogrel accountability

An accountability log needs completing for any clopidogrel dispensed, whether from pharmacy or straight from the ward/clinic stock. If a stock of clopidogrel has been dispensed to the ward (rather than a particular patient) then the investigator is responsible for completing a further log, once this is dispensed to a recruit. This must be kept in the Investigator Site File for audit/monitoring purposes.

Also a temperature log needs completing – check with your pharmacy regarding acceptable temperature ranges, as the drug will need replacing if temperature is logged outside these limits.

## Next TARDIS Teleconference

**Friday, 14 January 2011 12:30 to 1:30pm**

We will let you know by email of the freephone telephone number to ring. Please do not ring outside the above times as we do get charged for this even though the teleconference may have finished.

## P-selectin blood samples – new system

A new system for collecting the bloods for P-selectin testing is now ready. A few sites have already started using this new system. Full blood collection packs are being sent out to recruiting sites and will include all documentation and a powerpoint presentation for training purposes. We will be in touch with others shortly regarding sending supplies. If anyone has any queries/problems please do not hesitate to ring 0115 8230210.
